

Safe usage of the lamp

1. The lamp may be used as a decorative element and should be placed on even and hard surface, solely outdoors.
2. Before activating the device for the first time, ensure it is assembled correctly.
3. Before lighting it, ensure that its containers are not overflowing and the lamp has not been covered with biofuel.
4. Any biofuel containers should be placed in safe distance from the lamp (at least 1 metre).
5. To light the lamp, use long matches or extended lighters.
6. The only fuel to be used with the lamp is bioethanol – fuel/oil
7. Do not use any gasoline-based substances, or other flammable materials
8. Do not use the lamp continuously (longer than 6 hours).
9. Do not leave the lamp lit without supervision.
10. Due to high temperature of the lamp, avoid touching it during usage. Before touching the lamp, wait 15 minutes after dousing it or use protective gloves.
11. Do not ever add fuel to the burning container when device is lit (when the flame is burning), or to the container when it is hot.
12. Do not carry the lamp, when it is lit.
13. If some of the fuel spills, the device should be thoroughly cleaned, to avoid combustion outside of the container.
14. Before refilling the container with fuel, let the lamp cool (at least 15 minutes).
15. The lamp may be used only by adults. The burning lamp should be protected from children and pets.
16. Do not ever douse the lamp with water! To douse the fire before the fuel runs out, close the air intake using the relevant switch or use special equipment. (optional)
17. It is recommended to keep a fire extinguisher close to the lamp.
18. The manufacturer is not liable for consequences of incorrect usage of the lamp. The customer is obliged to familiarise themselves with rules of proper usage of the device.

Note!

When burning with fire, the device heats rapidly and is a burning hazard. Do not touch the device when heated, or use protective gloves.

When using the lamp, always adhere to fire safety regulations.

Warranty

The device is covered by a 2 year warranty. The warranty covers manufacturing and material defects, for replacement of faulty parts. Incorrect usage and individual modifications of the device void the warranty. Warranty details can be found in the Warranty Card attached to the device.
